***Information Disclosure Statement***

The information disclosure statement filed May 2, 2005 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because US 2002/124114 and US 2002/188718 do not contain the proper number of digits. The correct format is US \_\_\_\_ / \_\_\_\_\_. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Tzeng (US 6,574,240).

Art Unit: 2141

As per claims 1, 11, and 21 Tzeng discloses a method for communicating information in a server, the method comprising:

receiving at least one packet from a first blade server of a plurality of blade servers, at least a portion of which is coupled to a common bus; (Col 4 lines 22-30)

determining at least one identifier associated with at least a second blade server based on at least a portion of said received at least one packet; and (Col 5 lines 46-59)

routing at least a portion of said at least one received packet to at least said second blade server. (Col 6 lines 4-18)

As per claims 2, 12, and 22, Tzeng discloses the method according to claim 1, further comprising transferring said at least a portion of said at least one received packet to said at least said second blade server via said common bus. (Col 6 lines 14-18)

As per claims 3, 13, and 23, Tzeng discloses the method according to claim 3, further comprising determining at least one identifier of said switch blade. (Col 6 lines 28-41)

As per claims 4, 14, and 24, Tzeng discloses the method according to claim 4, further comprising determining at least one identifier of said first blade server. (Col 4 lines 46-59)

Art Unit: 2141

As per claims 5, 15, and 25, Tzeng discloses the method according to claim 4, further comprising determining at least one identifier of said first blade server. (Col 4 lines 46-59)

As per claims 6, 16, and 26, Tzeng discloses the method according to claim 5, wherein said identifier of said first blade server, said identifier of said second blade server and said identifier of said switch blade is at least one of a MAC address and an IP address. (Col 4 lines 46-59)

As per claims 7, 17, and 27, Tzeng discloses the method according to claim 1, further comprising: acquiring at least one identifier of said first blade server; and transferring said acquired at least one identifier of said first blade server to at least said second blade server. (Col 5 lines 46-59, Col 6 lines 14-18)

As per claims 8, 18, and 28, Tzeng discloses the method according to claim 1, further comprising broadcasting at least a portion of said at least one received packet on said common bus. (Col 7 lines 53-59)

As per claims 9, 19, and 29, Tzeng discloses the method according to claim 1, further comprising receiving a broadcast containing said at least one received packet. (Col 7 lines 53-59)

Art Unit: 2141

As per claims 10, 20, and 30, Tzeng discloses the method according to claim 1, further comprising receiving at least one packet from said second blade server and transferring said at least at portion of said at least one packet received from said second blade server to at least one of said first blade server and a third blade server. (Col 3 lines 15-28)
